Meteorologist's View

A fine if generally cloudy day in the mountains with distant views. If any showers form during the afternoon, they are most likely in western parts of the National Park.

Forecast for Friday 29 Jul 2022

Weather: Cloud amounts reducing through the early hours and becoming largely clear by dawn with a chance of patchy mist and fog forming in some valleys. Mostly sunny during the first part of the morning and whilst some cloud will bubble up, it will stay mainly dry with sunny spells through the afternoon and into the evening.

Maximum wind: South-westerly 15-20 mph.

Chance of cloud-free hill tops above 800m: 90%.

Low Cloud and visibility: Fog may briefly lift to patchy cloud around 300-400m for a couple of hours after dawn before dispersing. Otherwise, any cloud bubbling up will be above the summits. Generally very good visibility, but locally very poor in valley fog first thing.

Temperature: **Valleys:** Plus 9 Celsius rising to plus 22 Celsius.
At 800m: Plus 11 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.

Monday	Details are uncertain by Monday but showery rain remains possible, with a chance of heavy showers in places. Staying warm and humid leading to occasional hill fog. Winds remaining similar to Sunday with freezing levels staying above the summits.
